

# Catalog

The Skava Commerce Catalog microservice provides catalog editors and managers the ability to create and manage rich, transaction-ready product content in multiple, hierarchically defined catalogs. The Catalog service creates and manages structured as well as unstructured product content in the form of products, SKUs (variants of product), and product attributes.

## CATALOG MAKES MANAGING CATALOG DATA EASIER WITH

### SIMPLIFIED WORKFLOWS:

Project-based approval workflow provides extensive audit trail and versioning of each SKU and product. Business processes are done more efficiently by easily managing and tracking the tasks within a process including workflows and access to records of processes that are completed.

### SECURE AND SCALABLE APIS:

Provides the APIs for all the catalog related information including products, SKUs, attributes, projects, and more.

### INTUITIVE BUSINESS TOOLING:

Easily manage the catalog content with a very familiar Web user interface.

API response time  
of less than 250 ms

72 API Endpoints

## Features

Flexible Enrichment	Provides flexible product and SKU enrichment and content management in multiple locales (language, geography) to enable ecommerce in multiple geographies.
Fast and Easy Bulk Updates	Quickly and easily make updates to thousands of products and SKUs using an intuitive import and export file tool with accurate data validation and error-checking.
Attributes	Create consistent product enrichment for attribute and variant groups. Catalog supports both static and computed (dynamic) attributes, rich text for descriptions and any field and data type. Set your images and digital assets as attributes.
Product Types	Supports multiple product types (physical and digital), multiple product constructs (collections and bundles) and product variants based on attributes (size, color, style or any other user-defined attribute).
Bulk Import and Export	The attribute import tool allows you to create and update product and SKU and attribute data and export the same data using the catalog export tool.
Search, Filter, Sort	Allow shoppers to easily find products with Catalog's search, filter, and sort functionality.
Role-Based Access	Flexibility to support roles and permissions flexibility down to attribute level.

## Get started right away with Skava Cloud

Skava offers a risk-free opportunity to test drive our class-leading microservices without making changes to your infrastructure. Dig into Skava's tools in a full production environment, try integrating your existing solution, and see how microservices can up your game. Best of all, you can push your experiments to production at any time.
