

Customer

The Skava Commerce Customer microservice enables businesses to create and manage B2B and B2C customer information. In addition to managing user registrations and orders, you can manage identities, passwords, addresses and user profiles. With the ability to manage privacy and consent settings, you are well on the road to GDPR compliance.

CUSTOMER MAKES MANAGING USER DATA EASIER WITH

SECURE AND SCALABLE APIS:

Provides the APIs for all the customer related information.

INTUITIVE BUSINESS TOOLING:

Easily manage the customer content with a similar Web user interface.

Easily lookup and manage customer profiles and orders.

API response time
of less than 250 ms

72 API Endpoints

Features

Data in One Place

Manage all customer information such as registration, signups, identities, emails, phone numbers, and more.

Customer Address Book

Manage multiple shipping and billing addresses while having a default address.

Manage GDPR Compliance

With the ability to manage consent settings for customers, freeze customer accounts, delete customer accounts and download personal data, we fully support GDPR compliance.

Order History

With an easy to use business tool, customer service agents can quickly lookup a customer, update customer profiles, and view a customer's entire order history.

A risk-free opportunity to test drive our class-leading microservices without making changes to your infrastructure. Dig into Skava's tools in a full production environment, try integrating your existing solution, and see how microservices can up your game. Best of all, you can push your experiments to production at any time.
