

Skava Commerce

PLATFORM WITH AGILITY AND ENTERPRISE POWER FOR INNOVATION AND GROWTH

Skava Commerce is the modern ecommerce platform offering enterprise capabilities to satisfy complex B2B and B2C requirements with quick time to market. To top it off, we are API-first, cloud-native, cloud-agnostic and global. Skava Commerce is the last ecommerce platform you'll ever need.

Introducing a new paradigm in ecommerce architecture

Robust business tools to get the job done

Empower your business users with robust tools to manage different components of the platform. Some of our most unique and popular microservices include:

CATALOG: empowers you to create and manage rich, transaction-ready product content in multiple and hierarchical catalogs.

PROMOTIONS: supports your most complex use cases and an unlimited number of promotions with a flexible rules-based approach.

PRICING: enables you to create and manage multiple price lists, which can include its own currency and individual price types.

FOUNDATION: gives you the ability to provision your business with specific microservices and store settings.

MERCHANDISING: makes it easy to create and manage product taxonomy using static and rule-based dynamic categories. Visually build your Product List Pages, Product Detail Pages, category landing pages, site navigation and other digital experiences.

Omnichannel all the time

Independently deployable and scalable, Skava's microservices help you engage shoppers through any device or experience with relevant merchandising, content and offers tailored to each touchpoint.

Headless commerce

With API endpoints for Skava's microservices, you have the freedom to choose a front end of your choice. While Skava Commerce powers your ecommerce platform to give the best omnichannel user experience, you can provide the best customer experience to your customers with any front end.

Host it your way

Skava gives you the flexibility to deploy your application where it works best for your business.
Skava's flexible deployment options include:

SKAVA ENTERPRISE: host it your way on a cloud provider of your choice or hosted and managed by Skava

SKAVA CLOUD: multi-tenant, hosted and managed by Skava
